Carlton N3, Vic., Australia

Dear Joshua,

Thanks for your letter of July 15. Do you have any references to the Gal 3 mutant? If you have, please send them to me as soon as possible. I am writing a review for Advances in Enzymology. In this review I had a Section on Genes and Enzymes which I first gave up because Nord wanted the manuscript right away. When I told him that I had made the article briefer and cut out a discussion on gene-enzyme interrelation, he gave me three extra weeks since he particularly welcomed a discussion of such problems in Advances in Enzymology. I will, therefore, try to formulate an additional section but it will only comprise one-half to three-quarters of a page. I shall send you a copy. I will also discuss it with Kiyoshi.

Best regards to you and Esther from both of us. I am anxious to hear about your trip. I take off October 10 for Japan, India, Israel and Europe.

Sincerely,

Herman M. Kalckar
